

Hey there!
I'm ángela

and I'm a **UX/UI Designer**

About me

I'm Àngela Brunet, I'm from Barcelona, but currently I'm **living in Paris**.

Coming from a technical background, I fell in love with **UX/UI Design** and I decided to specialize in this field. I enjoy **finding new ways to solve daily** problems.

When I'm not pushing **pixels** or **coding**, I like to learn new **crafts**.

Educational Background

I studied **Multimedia Engineering**
at Universitat Ramon Llull
in **Barcelona**

I specialized in **UX/UI Design** through
Ironhack Bootcamp in **Paris**

Work experience

2019

Working in Avanade
Innovation Team as a
Junior Developer.

2020

I joined YASYT, a small
start up focused on
assistive robotics as a
Software Developer.

2020–2021

Discovering **tech
consultancy** with NTT
Data, working as a
Junior Engineer.

Projects

01 Care U: Mobile App

Mobile app designed to relief stress on cancer caregivers

02 Minquest: Timesheets

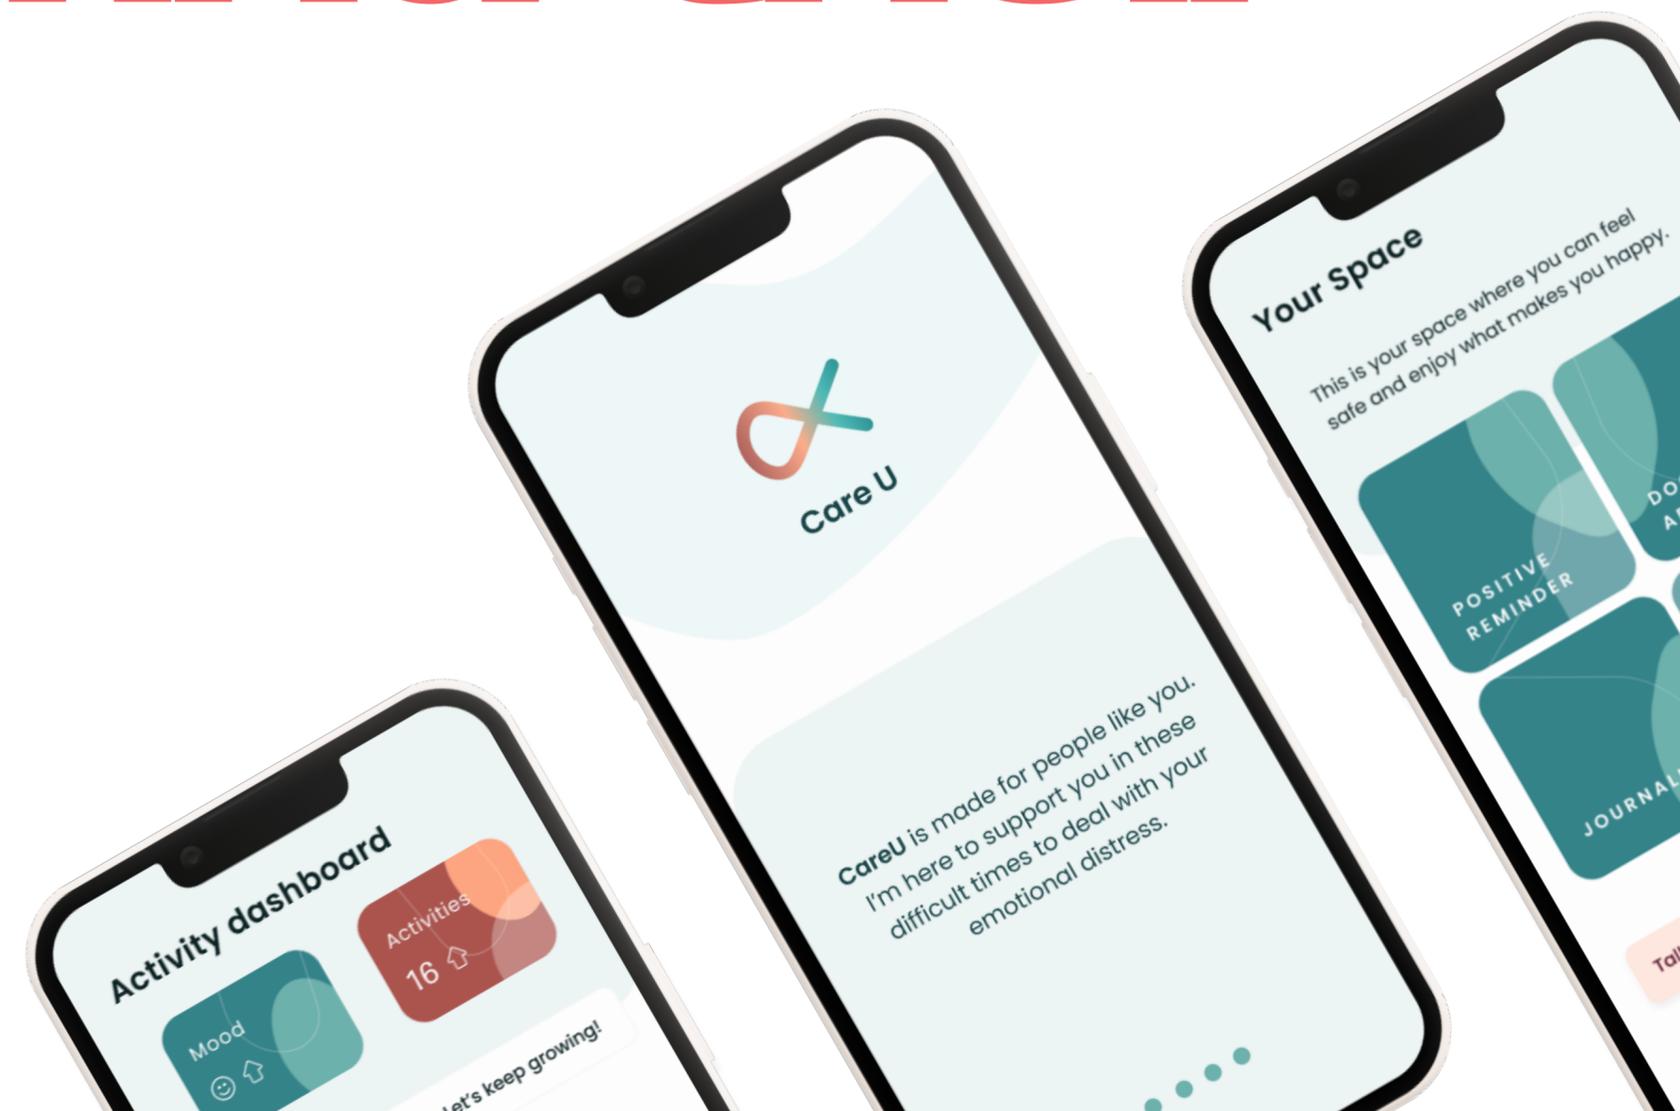

Redesign of mobile webiste version of timesheet feature

03 Adding Spotify Feature

How to make Spotify more social with a new feature

Care U: Where caregivers find their space

The creation of a wellness
mobile application

Brief

The NWI is focused on developing new tools and resources related to wellness. They ask us to create a set of **digital wellness tools** for wellness coaches and persons who work on **meditation and stress reduction**.

Also they wanted to **update their image** and create a new visual system that reflects their innovative and refreshed approach to wellness.

Research

Through **secondary research and competitive analysis**, we realized existing apps focused on the syndromes of stress but none of them in the cause.

Caregivers from people suffering an **chronic or severe illness** were the most forgotten ones. Through **six interviews and one survey** to cancer caregivers, we decided understood what made them **feel stressed** and what **could be a relief for them**.

5 million french
are cancer caregivers

10% of caregivers
are by their own

2h54 average
spent per day by caregivers

Meet Eva

Eva takes care of her **husband suffering lung cancer** while keeps **working** part time on her job. She **need to manage her time** with his new caregiver role.

"I feel that I'm in a gear that I can't stop"

Problem statement

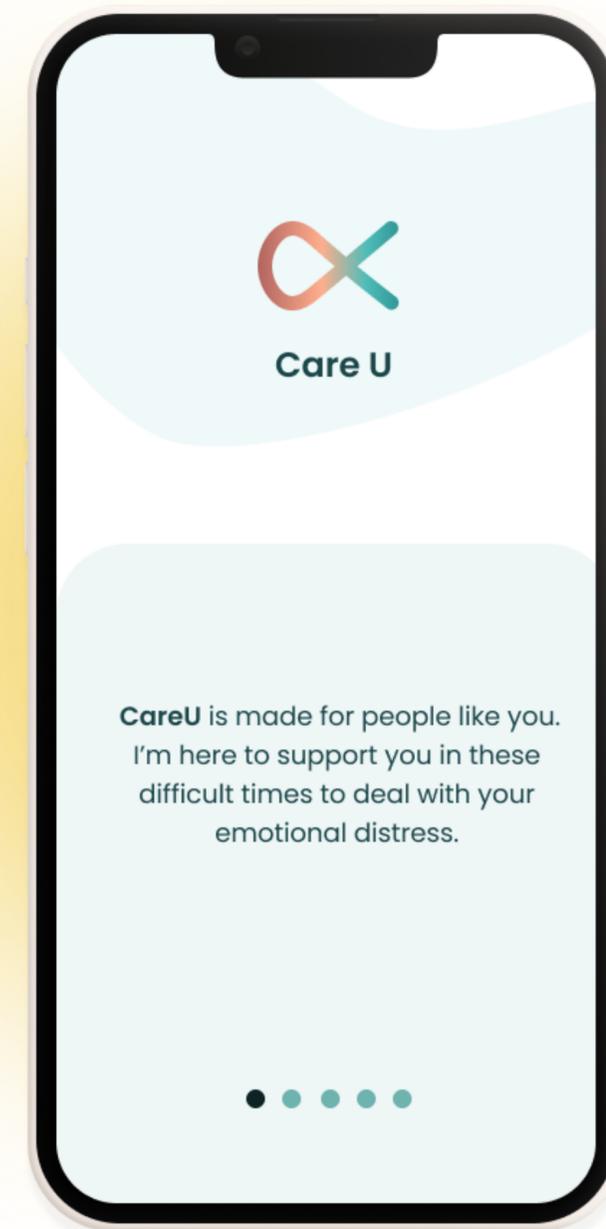

People who **take care** of someone suffering from **cancer** need to arrange their **priorities** because the **lack of time** results in **emotional distress**.

Solution

Through ideation process we designed a **new space for caregivers**, where they can take care of them self and communicate directly with their therapist.

Care U will **suggest** whenever they want **activities** to do, based on their **preferences**. Care U asks them **how are they feeling**, and in case of need the **doctor** will be notified.

Prototype & testing

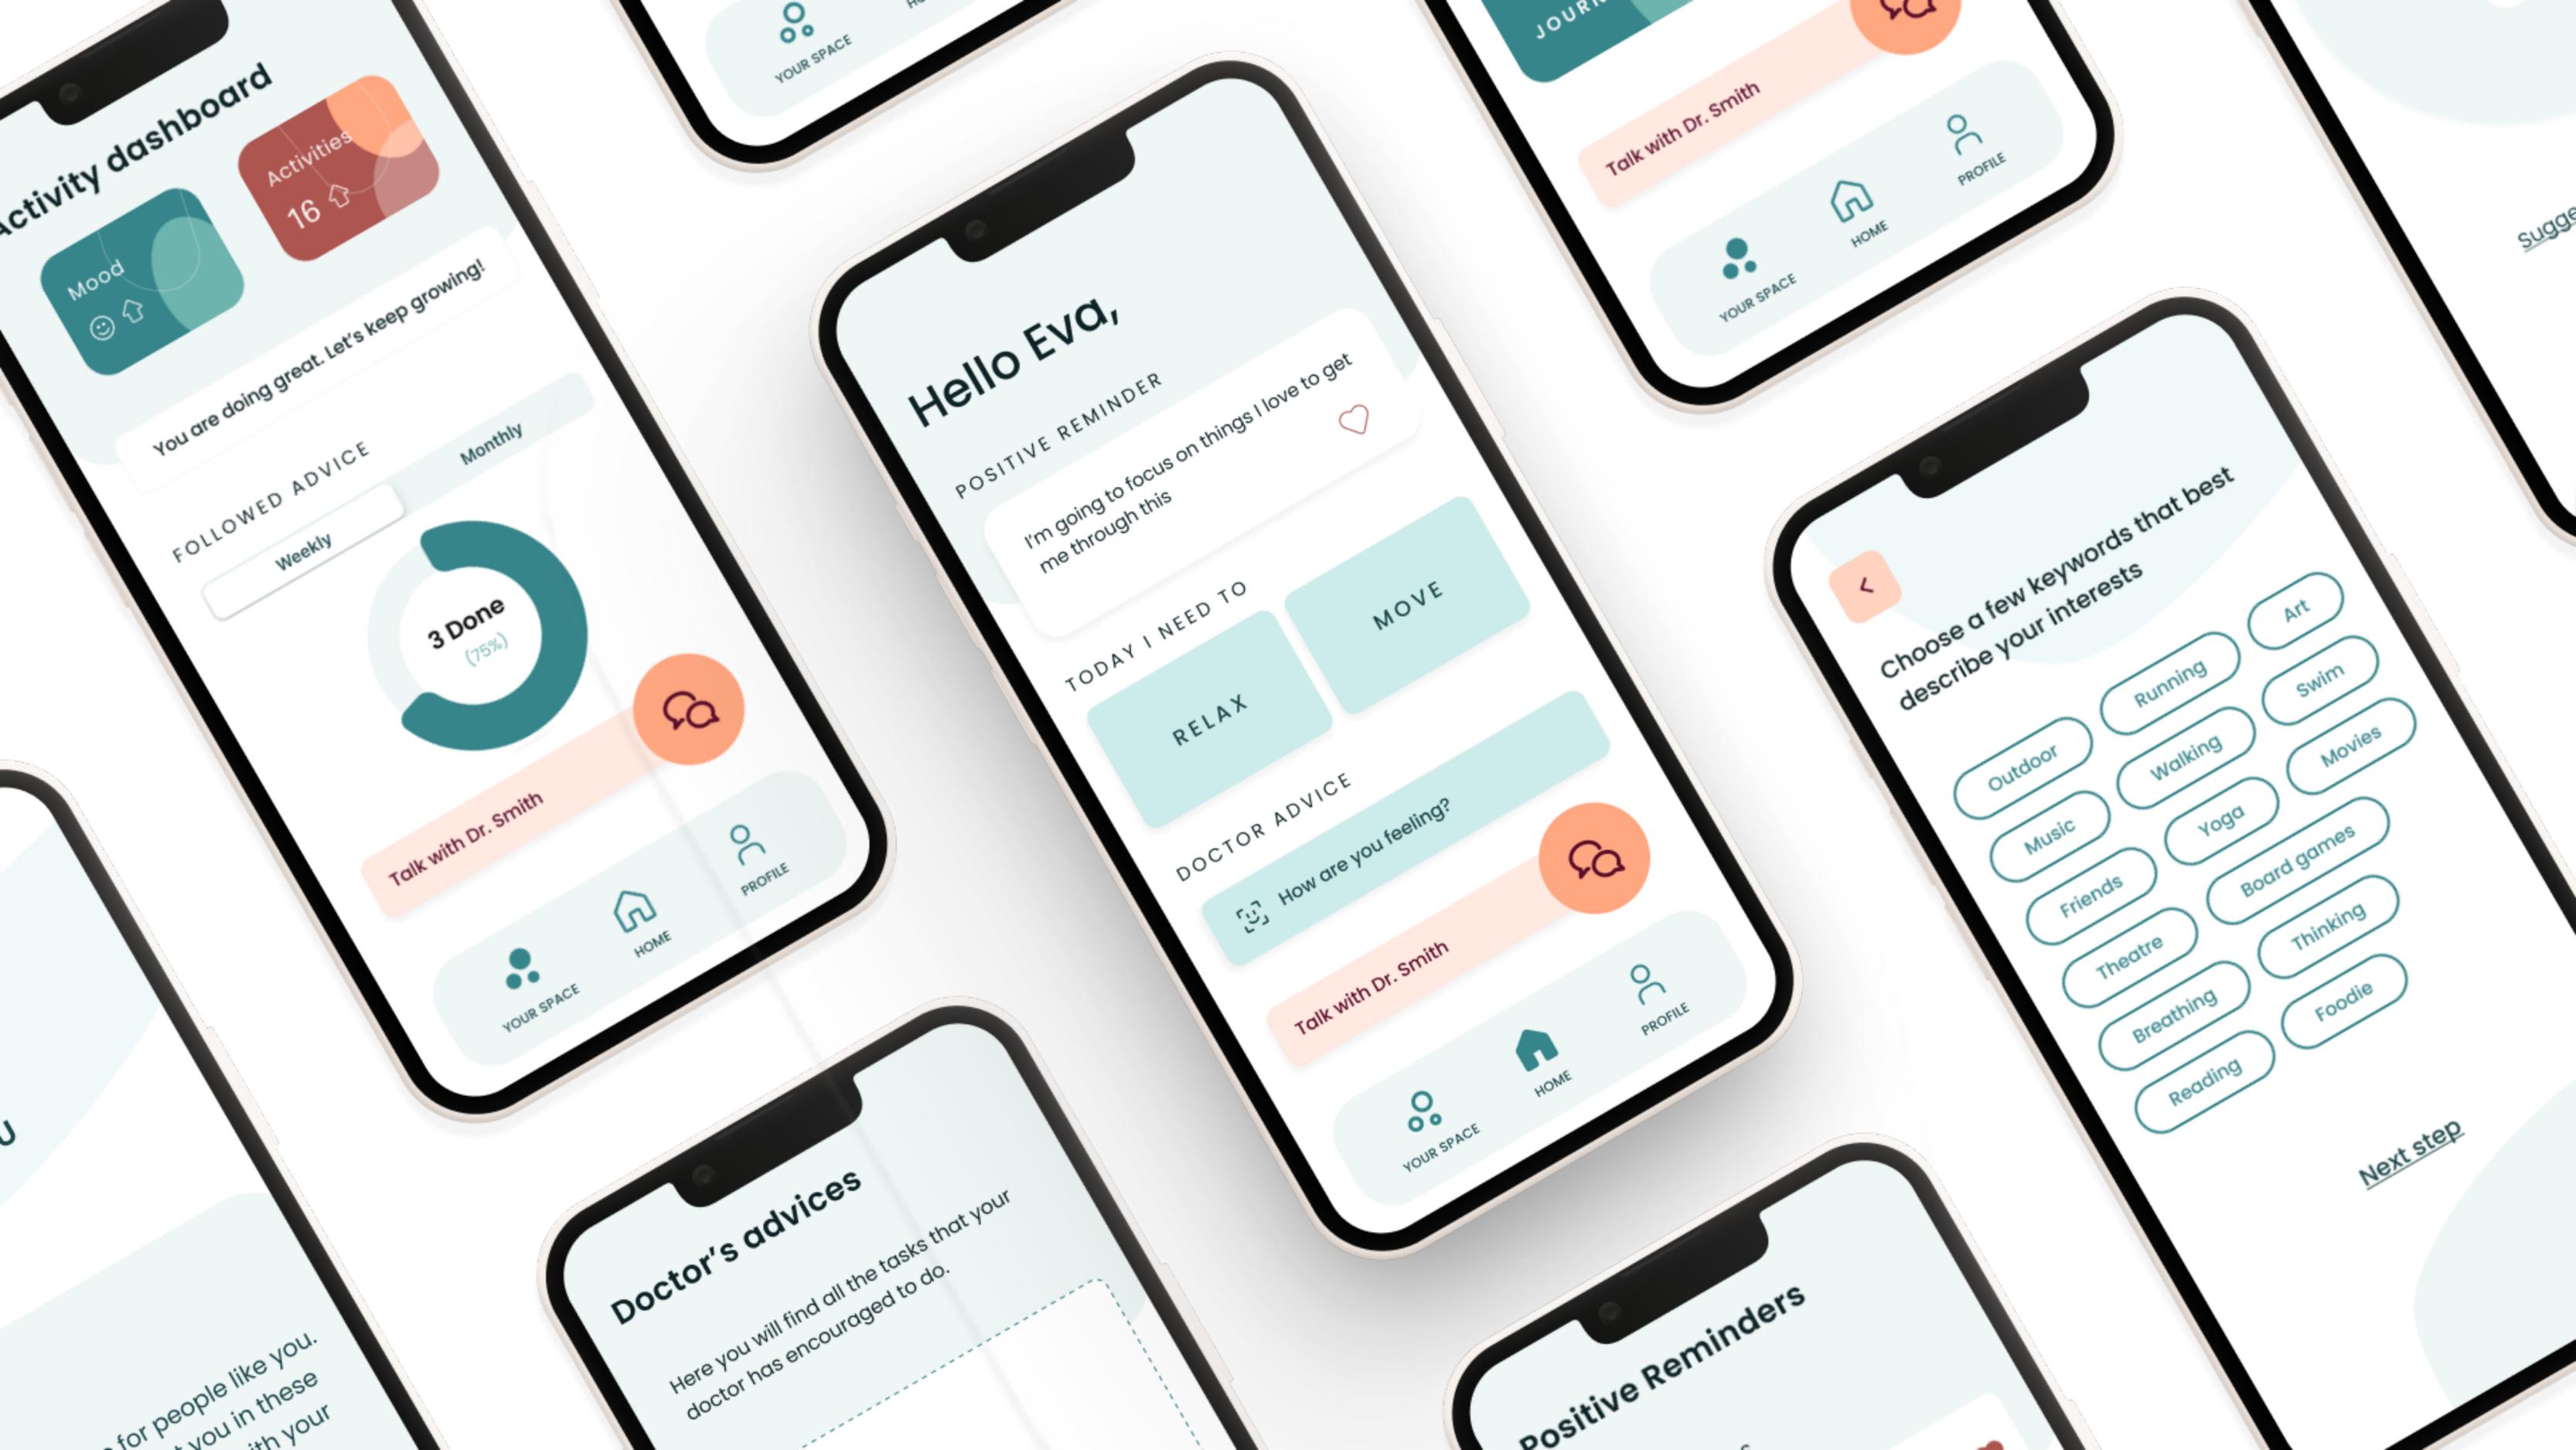

We conduct **multiple tests** to develop our **idea** and the **prototype** build.

After finishing usability tests in each stage we applied all the **changes** needed.

Mindquest: Timesheet feature

Helping freelancers to track time and log hours

Brief

Club Freelance who now is rebranding to **Minquest**, is a french platform that **connects IT freelancers with enterprises** and its missions. They needed to **redesign the timesheet feature** and improve **mobile website experience**. The feature enables freelancers to **log their worked hours** and send it to the client. The IT managers on the other side, needs to **validate or reject** the received timesheet.

Research

Users were **directly surveyed** on Miquest and 7 of them were interviewed to get deeper **insights about their timesheets feature usage**. We gathered their thoughts about what wasn't working on the current design and what they really needed.

We searched and **compared** how this feature was being developed in **other platforms**.

Main Findings

Cultivate trust

Freelancers need to cultivate trust with their clients to avoid continuous back and forth with their clients.

Diferent uses

Each freelancers has different priorities, methodologies and rates, so they need a flexible tool to track and log hours.

Not a fun task

As tracking hours can't be avoid, ha sto be as easy and painfullness as posible.

Meet Thomas

Thomas needs to **build a relationship of trust** with his clients. He would like to find **work-life balance** and manage his time.

"I love freelancing - but I won't lie, dealing with clients is sometimes hard"

Secondary Persona

Meet Nadia

Nadia wants to **recruit top talent fast** and not spend more than needed. She needs to **build tech expert teams** to work on dev projects.

“I want to hire quickly and track the project evolution as easily as possible”

48yo X

Paris X

IT Manager X

Networking X

Learn X

Problem statement

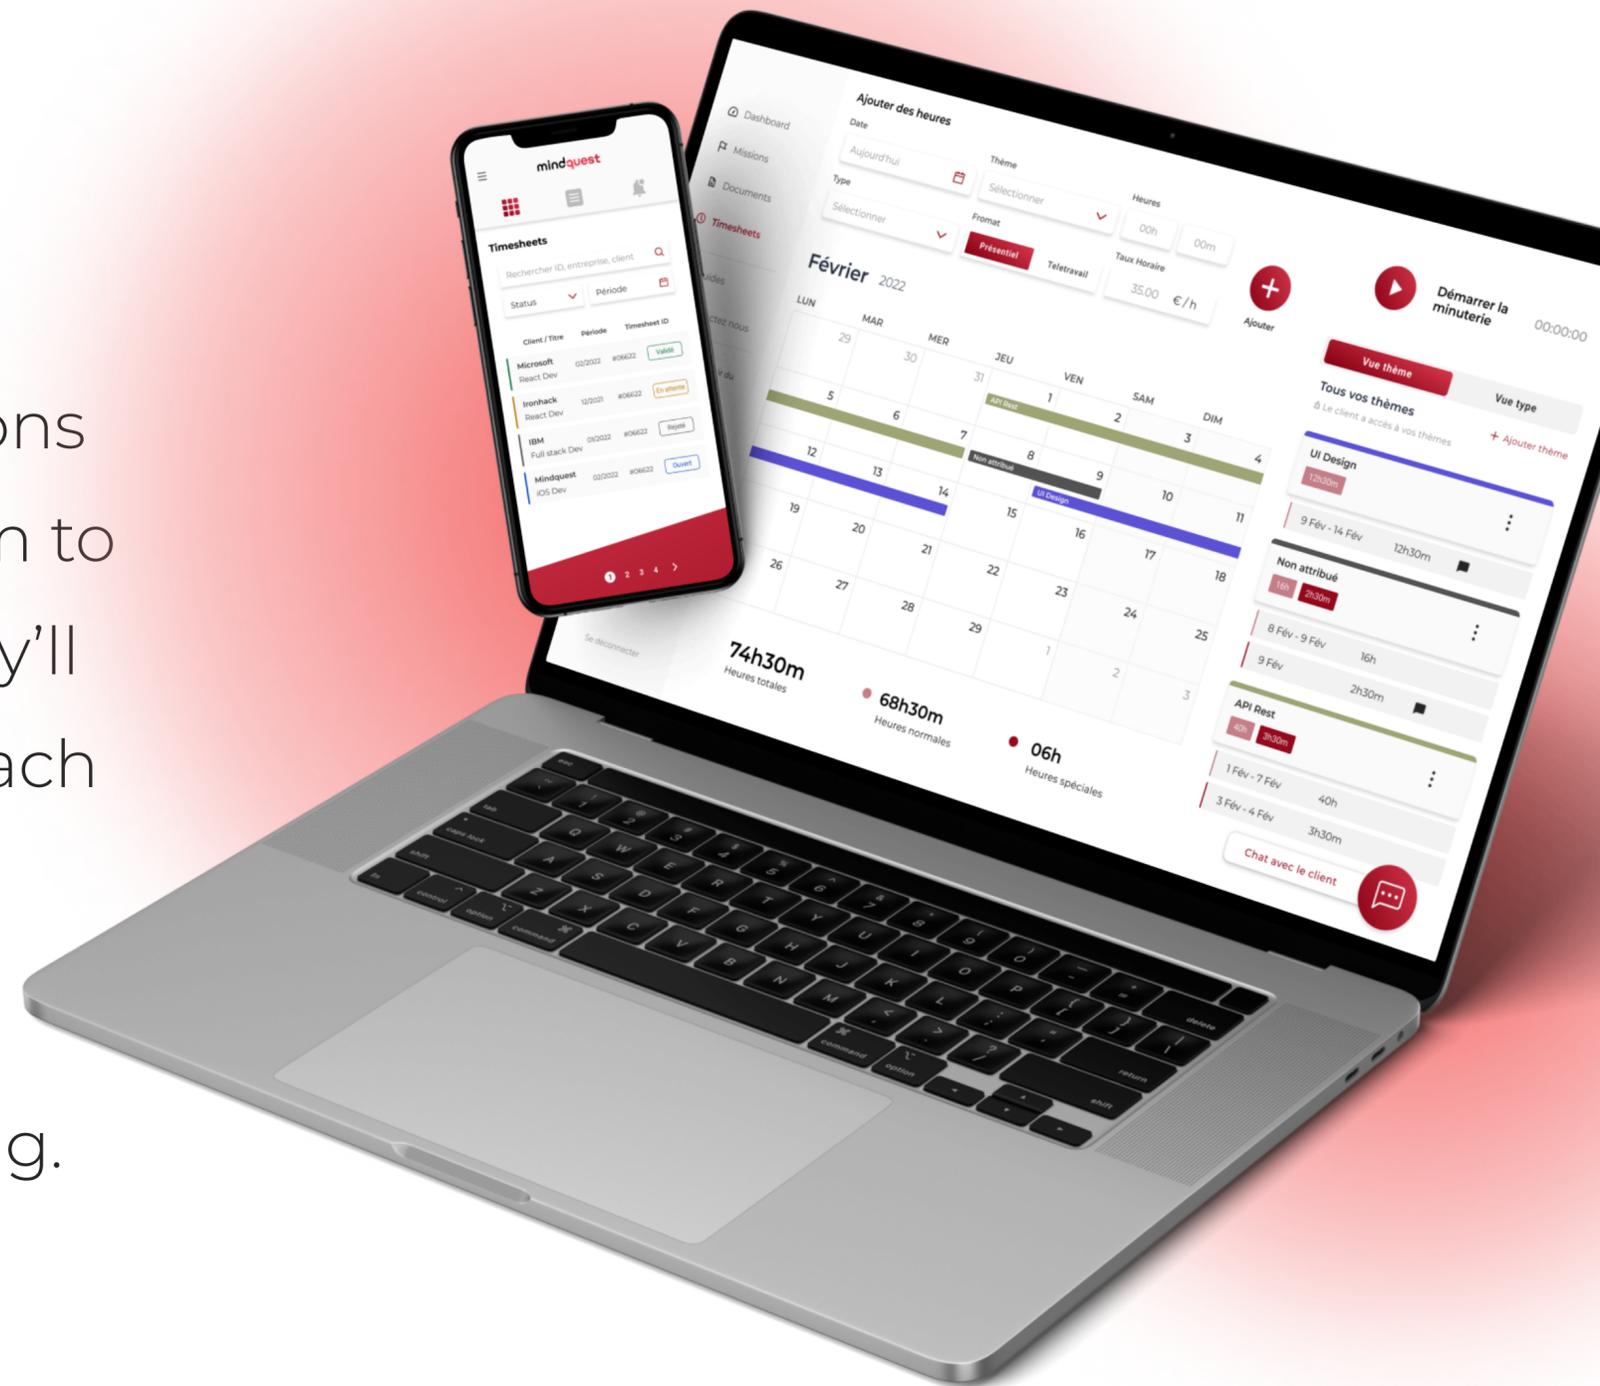

Freelancers need to have **quick and precise tools** to log hours and communicate with their client because **justifying their work at the end of a project frustrates them.**

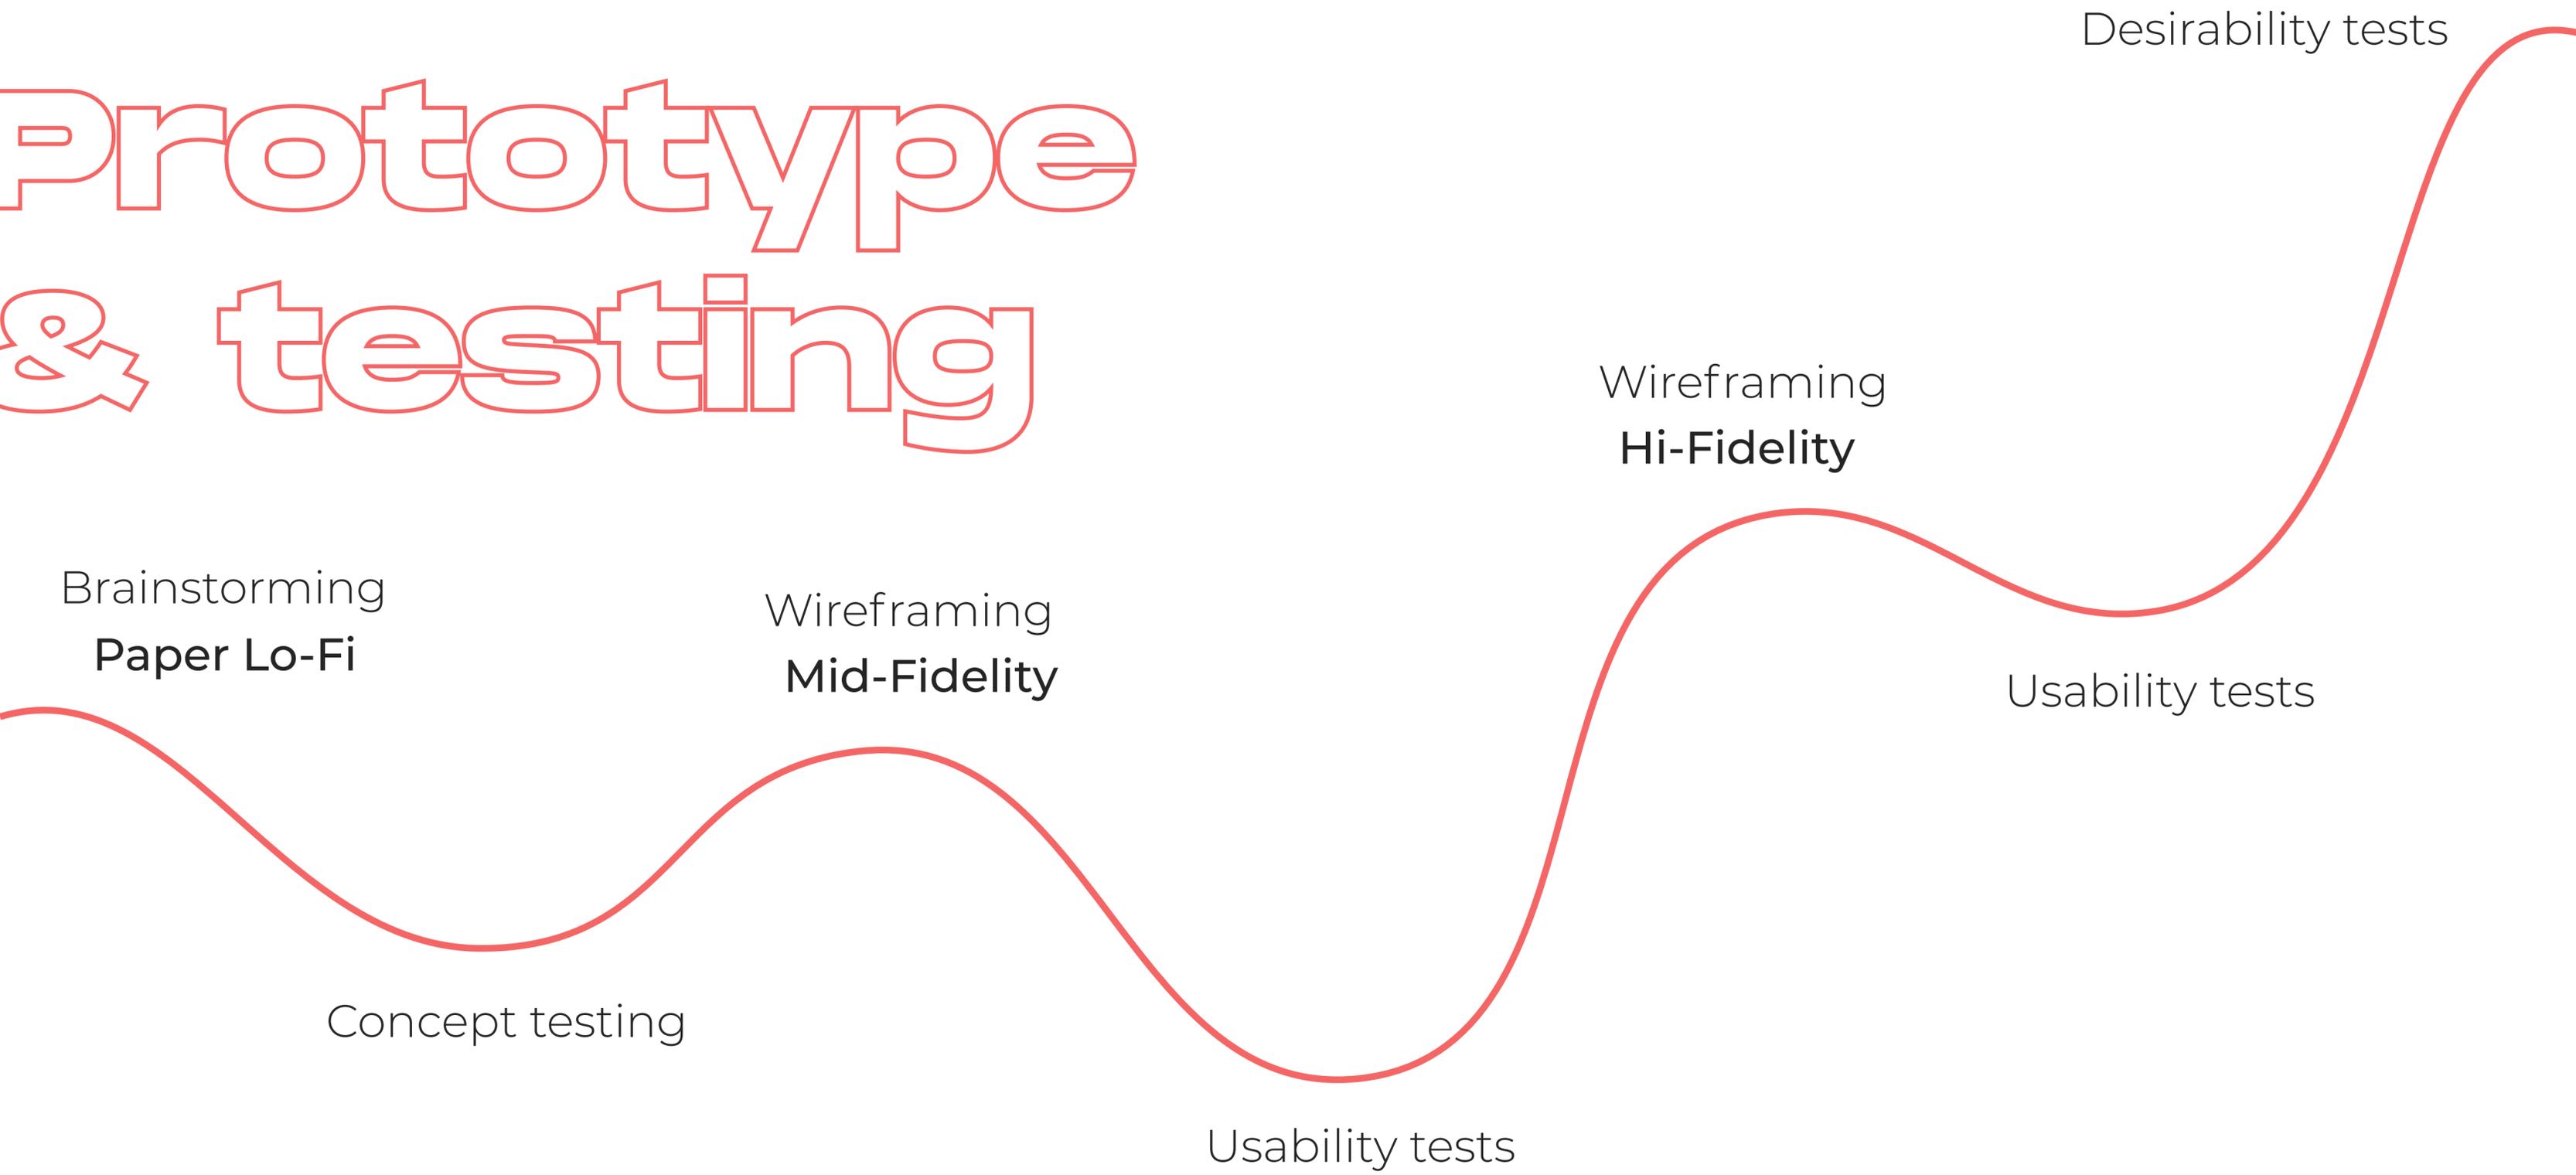

Solution

Freelancers now can check their logs with **different views**. They can **create** different sections or **steps to group the hours**. That will help them to organize and justify their work. Additionally they'll be able to **add a comment** or clarification on each log.

The IT Manager will be able to **give feedback** in each logged hours, before accepting or rejecting.
